

# SAN LEANDRO

## FAITH AND TRUST

The Ford Store of San Leandro has been working with Intivix since 1998. During this time, **Intivix has been instrumental in helping us grow** and update our systems from green screens to the PC/Internet/tablet paradigm.

There has been a lot of dealership consolidation in the Bay Area. I've heard lots of horror stories from our colleagues about virus outbreaks and crashed servers that have **hamstrung many of our competitors**. We have not experienced these kinds of issues, due to the sound network design and security protections Intivix has implemented on our network. I suspect that our longevity and success over the years is **linked in part to the stability of our network**, which increases our employee productivity, efficiency, and customer communications.

I am impressed with Intivix support—they are always available and present solutions to any of our concerns. We have complete **faith and trust** in them. They are a valuable partner for us.
